Our selection of supports for your frame

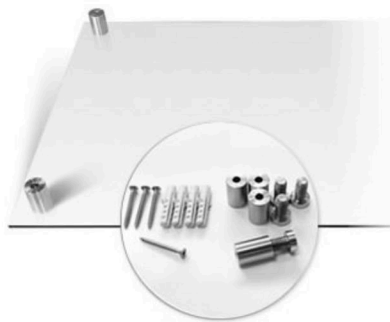

Aluminum profile

Thanks to the aluminum profile previously installed at the factory, the frame keeps a distance of approx. 1 cm relative to the wall.

Therefore, the print gains a floating effect after fixing it to the wall.

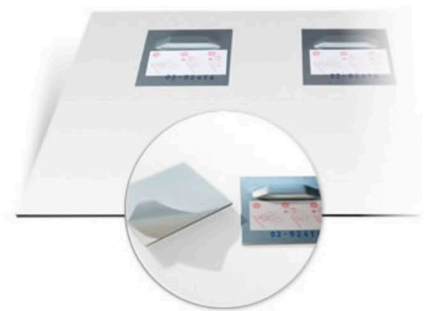

- Not visible from the front
- Available for all formats
- Assembly carried out in our factory
- For indoor use only
- 1 cm away from the wall (floating effect)
- [More information and instructions for wall mounting](#)

screw-in brackets

The panel already includes the respective perforations so you can fix the screws to your frame.

- Screw-on brackets are shipped with the order so that the customer can install them later.
- From the front, only the screw trims are visible.
- Available for certain formats.
- [More information and instructions for wall mounting](#)

standard support

The standard brackets allow you to fix your personalized frame easily and without complications, as you will only have to glue them to the back of the frame.

- They are not visible from the front.
- The order includes standard brackets with wall spacers (silicone drops) to be installed by the customer.
- Suitable exclusively for interiors.
- Available in various formats
- [More information and instructions for wall mounting](#)
